

# CELVAA

mobilitysolutions

celvaa was established in 2015 as a provider of IoT (Internet of Things) solutions and PDA terminals.

Our goal is to offer customers high-performing and quality products. The Company's terminal products are certified by IP65 Industrial Waterproof and Dustproof Standard Certification, EU CE certification, International ROHS System, American FCC Certification, ISO9001:2008 Quality Management System, and ISO14001:2004 Environmental Management System.

Our handheld terminal devices are equipped with a flexible configuration open platform and mainstream embedded operating systems like Android, Windows CE, or Windows Mobile. They feature integrated 1D/2D barcode scanners, LF/HF/UHF RFID readers, fingerprint readers, thermal printers, MSR, PSAM, 2.4G communication, and IR meter reading function modules.

## ENTERPRISE CULTURE

At celvaa, our main goal is to provide our clients with the best products possible.

We believe that technology needs to be people-oriented. Celvaa which is rapidly becoming a leader in the Internet of Things (IOT), has a highly qualified management team, a professional technical team that works towards a common goal.

## **Warehouse management**

By using celvaa's mobile data terminals for data collection and management, warehouse management can be greatly improved.

## **Logistics distribution**

By using celvaa's mobile data terminals for data collection and management, logistics information delivery can be significantly improved.

## **Manufacturing Management**

celvaa's mobile data terminals enable real-time management of production line data through barcode scanning or RFID data collection. By automating data collection, the company can reduce the need for manual input from employees, increase data accuracy, and meet all requirements for production adjustment on the production line. This ultimately leads to improved production efficiency for the company.

## **Asset management**

By using celvaa's mobile data terminals, companies can effectively manage large amounts of assets.

## **Retail Management**

celvaa's mobile data terminals can significantly improve data management efficiency for retail companies.

## **Inspection of power equipment**

celvaa's mobile data terminals provide a convenient solution for daily, weekly, monthly, and annual inspections of power equipment. By automating data collection and management, the company can reduce the risk of errors and omissions while ensuring the timely and accurate collection of inspection data. The terminals also allow for easy data upload and download, further enhancing efficiency in the inspection process.

IP 66 | Water Proof | Dust Proof | Anti Drop | Rock Solid

Ip66 can withstand 1.2 meters drop  
Impact on the concrete floor  
High pressure water gun impact test, the equipment can still operate normally.  
Sturdy and durable.

## LARGE CAPACITY BATTERY LASTS LONGER

4800mAh continuous operation ■ 72 hours Standby time ■ 72 hours
